

## EXCEPTIONAL VALUE

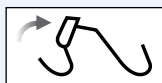

### TUNGSTEN CARBIDE TIPPED SAW BLADES

Rake: POSITIVE

Rake: ZERO

Rake: NEGATIVE

**Positive rake** blades offer a fast speed of cut and are more suitable to portable machines or machines where the wood is fed through the blade i.e. table or rip saws with a fixed head. These blades offer excellent value for money and incorporate laser expansion slots to help reduce heat build up to prolong the blades service life.

**Negative & zero degree rake** blades are more suitable to machines such as mitre or radial arm mitre saws where the blade will be dropped down through the work piece, the negative rake will help reduce bite into the wood and in turn help avoid dangerous kickback.

### Circular Saw Blades

These blades are of a superb quality and have been sourced to offer the user optimum lifetime at the best price! Most blades are supplied with reducing bushes to suit most popular makes of machine.
